

Fall, 2024 Field Course Offering!

Are you interested in...

Learning outside and helping the local land trust?

Field-based geo-technologies like drone imagery, mobile GIS apps, GPS, and surveying?

Historical records and public opinion about preserved lands?

Environmental processes that act in forested watersheds?

How land trusts use these tools for protecting landscapes?

GEOG 3420: Field Methods in Physical Geography

Lecture 12:20-1:25 M/W , Lab 1:40-4:30 M

Professor Andy Jolly-Ballantine, Department of Geography

Get outside to learn about how to gather information in the field while hiking trails and helping the Joshua's Trust collect data about their properties!

Google 360 camera trail view

Mobile Public Opinion Questionnaires

Drone Imagery

Land Use Mapping

Mobile GIS Apps

GPS

Topographic Surveying

Field Sampling
